

AIRWORKS ENTERPRISE PTE LTD

Unit of Wild Honey Hunters

Brings you the most finest varieties of Natural(Wild) honey in the world, collected from the Globally recognised Biosphere regions.

"The Western and the Eastern Ghats of India"

"Your Search for Real Honey Ends Here."

About Us :

With over two generations of experience, Wild Honey Hunters deals only in 100% real forest honey. Our natural honey products have their roots in the most interior forest areas across the Eastern and Western ghats in India – solely from only free-range hives, not from commercial bee keeping.

In a nutshell, we have perfected the art of collecting honey from the unreachable places in the wild and bringing exciting varieties to your doorstep.

Kombu Honey

The small bee or Kombu forest honey has been one of the most sought-after natural substances since ancient times. This type of bee, the *Apis Florea*, goes and collects nectar mostly from smaller medicinal plants and builds the hives inside bushes and smaller branches. Size doesn't matter as far as honey is concerned! Our small bee honey comes with unfiltered high pollen content and plant-based polyphenols.

Specialities and Uniqueness

Best immunity
booster

Highly used in
traditional medicine

Most demanded honey
from ancient times

Ghats Honey®

Cavity Honey

Cavity Honey or layered Honey aka aduku thaen (locally), is one of the highly demanded Wild Honey in traditional and alternative medicinal field. Cavity Honey is made by another group of small bees known as Apis Cerena which is rare to find and their honey is always high in demand. With presence of more propolis and pollen, this type of Forest Honey is highly medicinal and boosts immunity. Useful in resolving fertility issues in both gender and improves Libido naturally.

Specialities and Uniqueness

Naturally boosts
your overall
immunity

Improves
Libido for both
gender

Helps resolve
fertility issues in
both genders

Multifloral Honey

Multi floral honey is known as the “honey of a million flowers.” The bees bring nectar from different flowers from a region during a particular season. Taste and texture constantly change with every collection based on the nectar properties of the available flowers. Our multi floral forest honey is collected from the dense forests of the Western Ghats - one of the most protected biosphere regions in the world. Packed with essential enzymes and microbes, it is unlike any other brand when it comes to purity, taste, texture.

Ghats Honey®

Specialities and Uniqueness

Keeps you
fresh and
energetic

Stimulates good
amount of nutrition
absorption from food

Improves

health

Palai Poo Honey

Ghats Honey®

Specialities and Uniqueness

The Paalai tree is also known as the blackboard tree. It has a worldwide reputation for being high on medicinal ingredients. During this tree's flowering season, the bees find abundant nectar in these flowers – as they migrate from one place to another. Our unfiltered approach gives the honey a natural golden-yellow colour, a rich texture, ripened fruity aroma and taste.

Increase effective
nutrition absorption
from food

digestive system &
Builds Stamina

One of the best
in both taste and
also properties

Moringa Honey

Also known as the horseradish tree, the Moriga tree is a highly medicinal natural resource. From its leaves and roots to the seeds, each part possesses preventive abilities to fight many diseases. We source this honey during annual flowering season of Moringa trees around the Kodaikanal foot hills in Febraury and March of every year. Based on bee types, Moringa honey texture will be from transparent gold to opaque brown. It comes equipped with rich antioxidants and anti-inflammatory propeties.

Specialities and Uniqueness

High in Iron
content & The

The Wild honey Collection.

Ghats Honey®

Stingless Bee Honey

- World most rarest honey
mother of medicine

"Indian stingless Bees aka the Dammer bees" are one of the rarest and smallest forms of honey bee colonies in the world. Honey is stored in pot shaped structures built with the help of propolis. These bees collect nectar and pollen from flowers of highly medicinal plants. It's honey is known as "Mother of Medicine" possessing high medicinal properties than all other honey varieties available. The honey is darker and thicker and it is the only honey which tastes sour and sweet.

Specialities and Uniqueness

Stingless Bee Honey

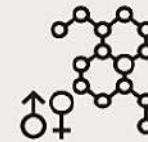

- World most
rarest honey
mother of medicine

It's a Natural antioxi-
dant, keeps you young,
shining and glowing

Resolves fertility
issues in both
gender

Helps in overcome
hormonal imbalance

Helps in effective
digestion and nutrition
absorption from food
and maintains good
health

Improves Libido
and athletic stamina

Used in treatment of
cancer

Heals the wound
faster than other
varieties

Mudakathan Honey

Mudakathan keera or indravalli (Balloon vine creeper) is a highly medicinal plant used as both food and medicine all over India. Once the annual flowering season is over, we source pure Mudakathan floral nectar based honey. Mudakathan honey has also quickly become one of our hottest sellers due to its yummy fruity taste. It is high in iron and calcium content and fully equipped with immunity-building properties.

Ghats Honey®

Specialities and Uniqueness

Acts as a natural energy booster

Strengthens bones, joints, and ligaments

Improves stamina and fitness

Neem Honey

Neem trees may flourish all over India, but there's an art to sourcing neem honey after its annual flowering season in months of March and April around southern parts of India. This honey is renowned for the richness of medicinal ingredients that are inherited from the neem trees. Naturally equipped with anti-fungal and anti-bacterial properties, neem honey has been proven to help maintain healthier skin. It also holds blood purifying properties through by way of its ability to flush out unwanted toxins.

Specialities and Uniqueness

Helps in the
purification of
blood

Alleviates throat
and periodontal
infections

Keeps your
skin healthy
and glowing

Jamun Honey

Jamun honey is probably the only variety that tastes a little bitter, but there's no doubt that you will be back for more! We expertly collect this honey during the annual flowering of jamun trees. Packed with iron content, Jamun honey is a vital source of Vitamin A and C. It is also rich in astringent properties, which can go a long way to treat skin-related

Specialities and Uniqueness

Very low in glycemic value and so more suitable for diabetic people

Resolves digestive problems and regulates bowel movements

Improves haemoglobin

Ghats Honey®

Another highly demanded Wild Honey from grounds of South India is the Thumbai Poo (flower) honey. Just like the plant, Thumbai Poo Honey is equally medicinal and this Forest honey is best to treat dry cough, soar throat, gives quick relief from cold, best for sinus and migraine headaches and cures asthma in long term usage. Best suitable for children and adults to improve immunity greatly.

Ghats Honey®

Specialities and Uniqueness

Treat dry
cough, sore
throat and cold

Best for sinus
and migraine
headaches

Helps in treatment
of asthma and
respiratory problems

Thumbai Poo Honey

Karung Kurinji Honey

Similar to the Neela Kurinji variety, Karung (black) Kurinji honey is one of the rarest types of honey in the world. It is sourced from a shrub that blossoms only once in seven years over different regions on a different time frame. On mark of this seventh year (2021) and with the blessings of the honey bees, we successfully harvested this honey and started delivering around the globe. We source Karung Kurinji honey using only natural methods and unlike nobody else does!

Specialities and Uniqueness

Antibacterial
and anti-
inflammatory

Helps manage
hormonal
imbalance

Strengthens
overall immune
system

Neela Kurinji honey

There's a reason why the Neela Kurinji honey is considered as liquid gold. It comes from the greenish-yellow nectar of the Kurinji shrub that only blossoms once in 12 years. Botanists and nature lovers from all over the world gather to witness this spectacular event. We naturally source this rarest honey on the planet that comes with transparent greenish-yellow texture that gradually darkens over time and holds a very unique taste.

Specialities and Uniqueness

Antibacterial
and anti-
inflammatory

Helps manage
hormonal
imbalance

Strengthens
overall immune
system
